

CREATING CONFIDENT BALLET TEACHERS ONE STUDIO AT A TIME

Welcome to The Ballet Method TM! These modules are comprised of syllabi that have been designed by dance professionals with over twenty years of teaching experience and studio ownership. As former professional ballet dancers with ballet performance and ballet education degrees from the University of Utah, Katie Beliveau and Anne Marie Kimmell have gathered years of expertise in the field of ballet. They have created ballet syllabi that can take your two year old student through your senior in high school through successful ballet training!

These syllabi are the solution for the teacher who is not quite sure of what to teach within the ballet technique to what age and to what level student as well as how to break down each step. The syllabi are color coded to show you what steps are newly introduced at each level so you are aware that you will be teaching a new skill. Any skill that is in blue text is either a new step or an enhancement of a step that needs to be broken down within that syllabus. Implementing The Ballet Method TM will ensure that you will not skip over any important ballet skills and that you are teaching age appropriate material as you interact with your students.

The Ballet Method TM also offers in house teacher training workshops! If you are a studio owner who finds yourself wanting a more thorough explanation of the modules as well as hands on training, you also have the option to bring The Ballet Method TM to you. Teacher training workshops can provide a great education to your staff! With in person explanations of how to break down ballet technique and how to choose appropriate music tempos, your teachers will complete the weekend with a new confidence in the ballet classroom!

Please let us know if you have any other questions! We appreciate your interest and look forward to working with you to create a meaningful training event for your teachers for the benefit of your students for years to come!
